

Lab Exercise 20

Creating a Pipeline Script

Name-Misha

Batch-2(DevOps)

SAP ID- 500119679

Objective: To create a pipeline script for automating build processes in Jenkins

Tools required: Jenkins

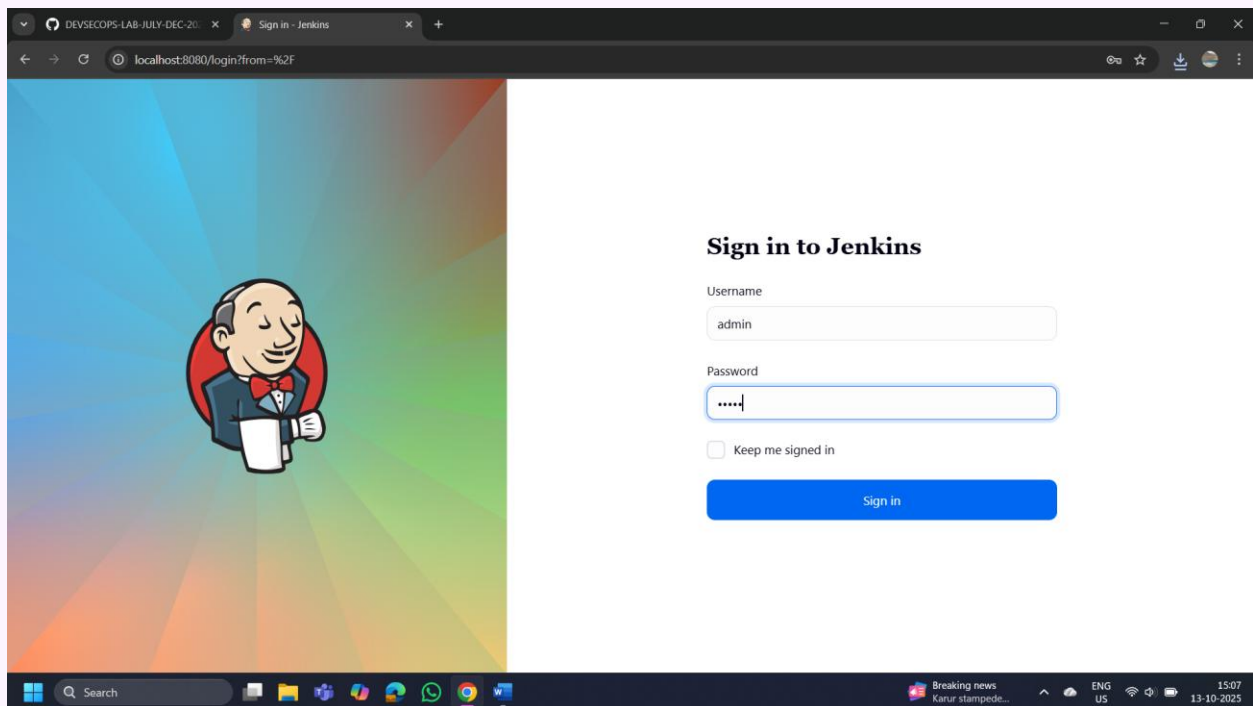

Prerequisites: None

Steps to be followed:

1. Log in to the Jenkins CI tool and create a pipeline script

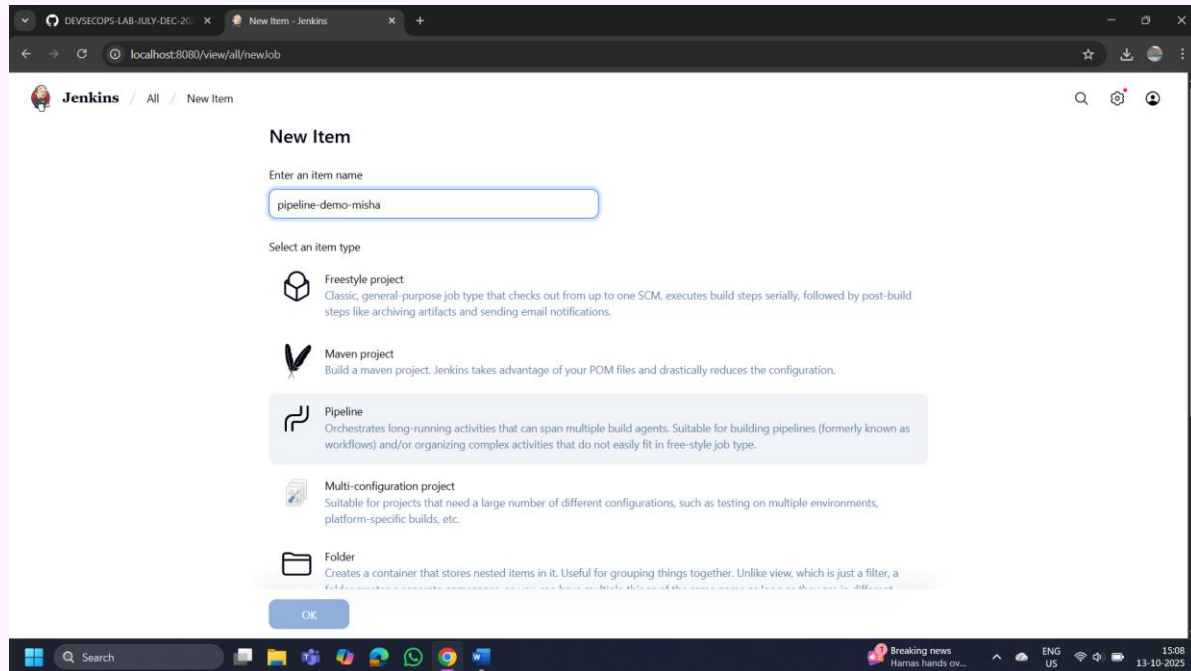

Step 1: Log in to the Jenkins CI tool and create a pipeline script

- 1.1 Open the browser, go to the Jenkins **Dashboard** by typing **localhost:8080** in your browser, provide the credentials, and click the **Sign in** button

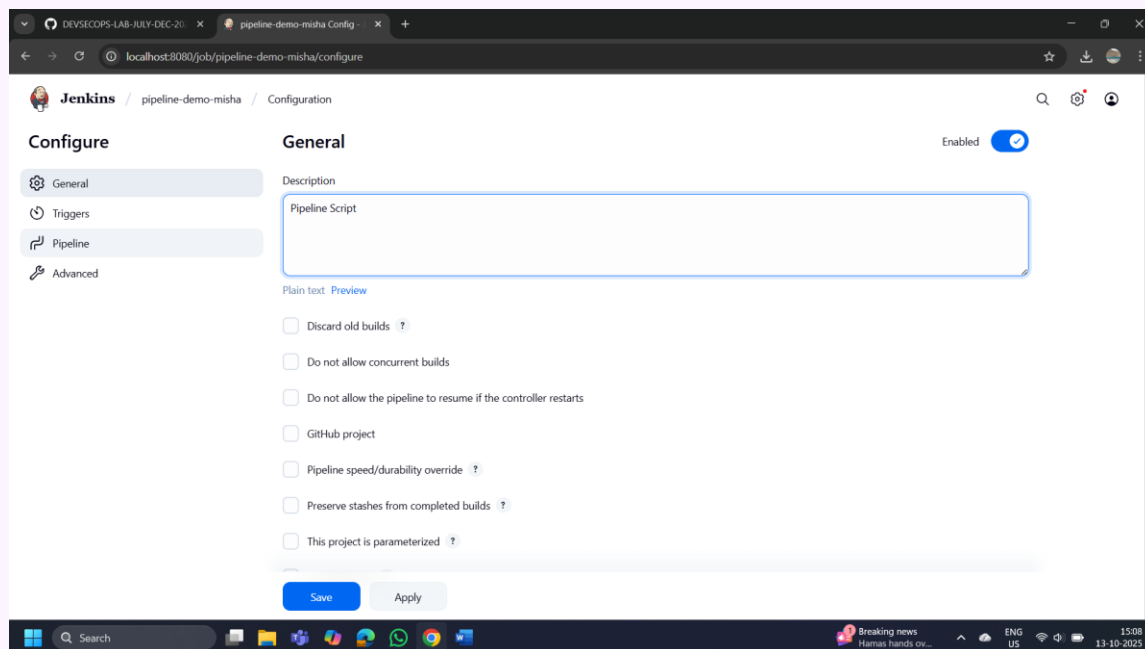

1.2 Click on the **New Item** option as shown in the screenshot below:

1.3 Enter a desired name for the project, select **Pipeline**, and then click on **OK** as shown in the screenshot below:

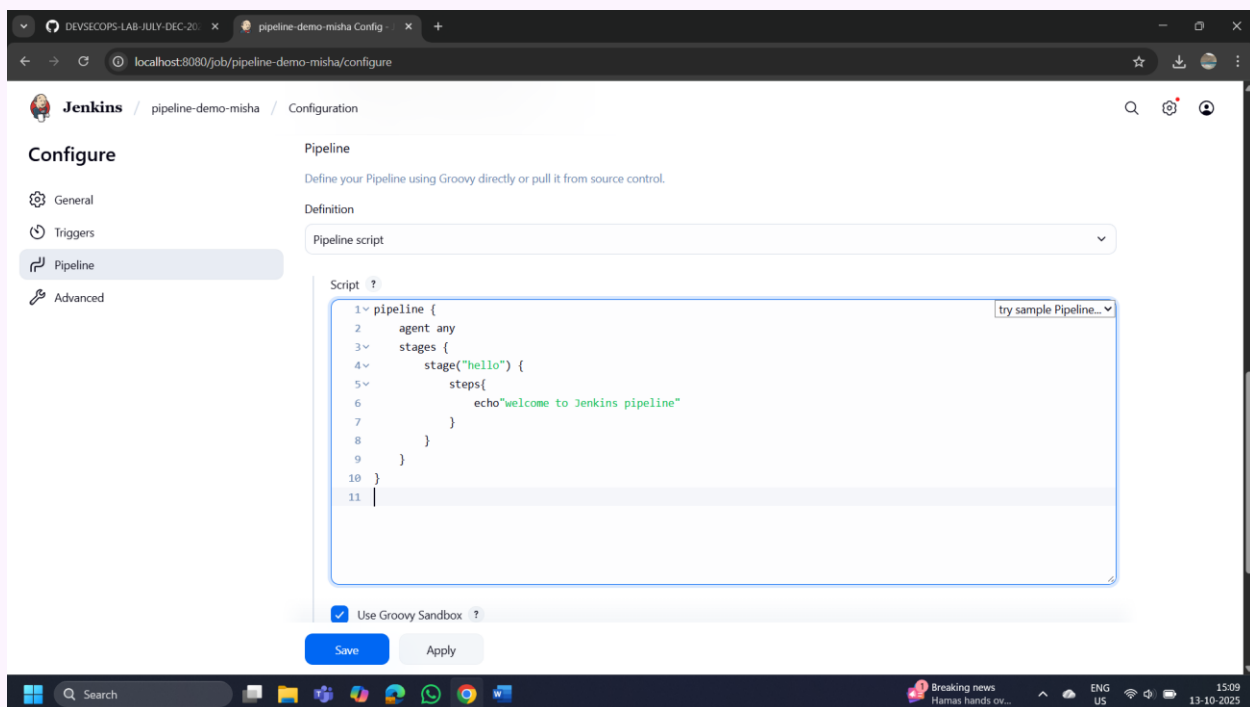

1.4 Click on **Pipeline** as shown in the screenshot below:

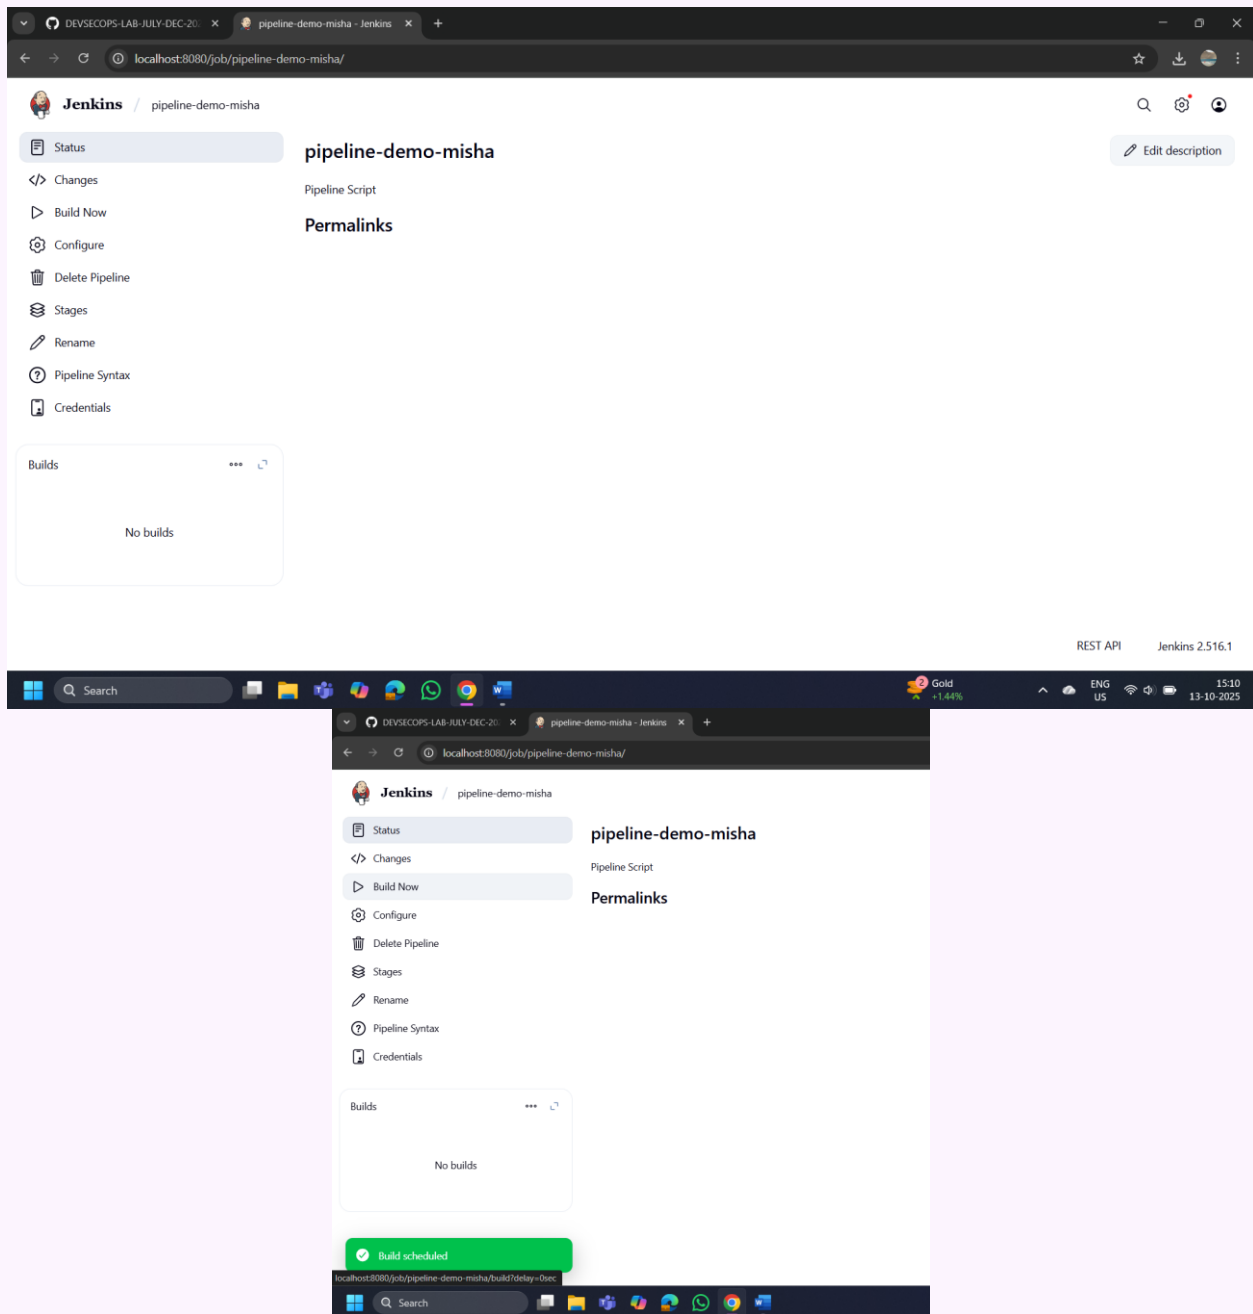

1.5 Enter the following pipeline script in the script editor and click on **Save** as shown in the screenshot below:

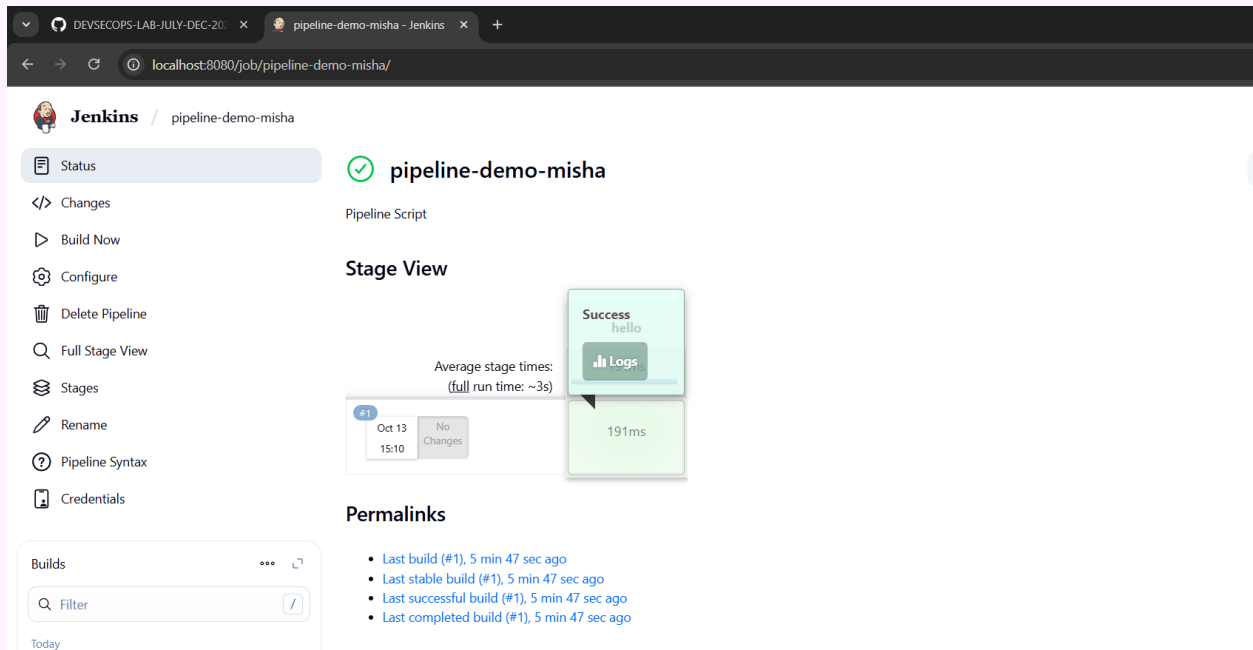

```
pipeline {  
  agent any  
  stages {  
    stage("hello") {  
      steps{  
        echo"welcome to Jenkins pipeline"  
      }  
    }  
  }  
}
```

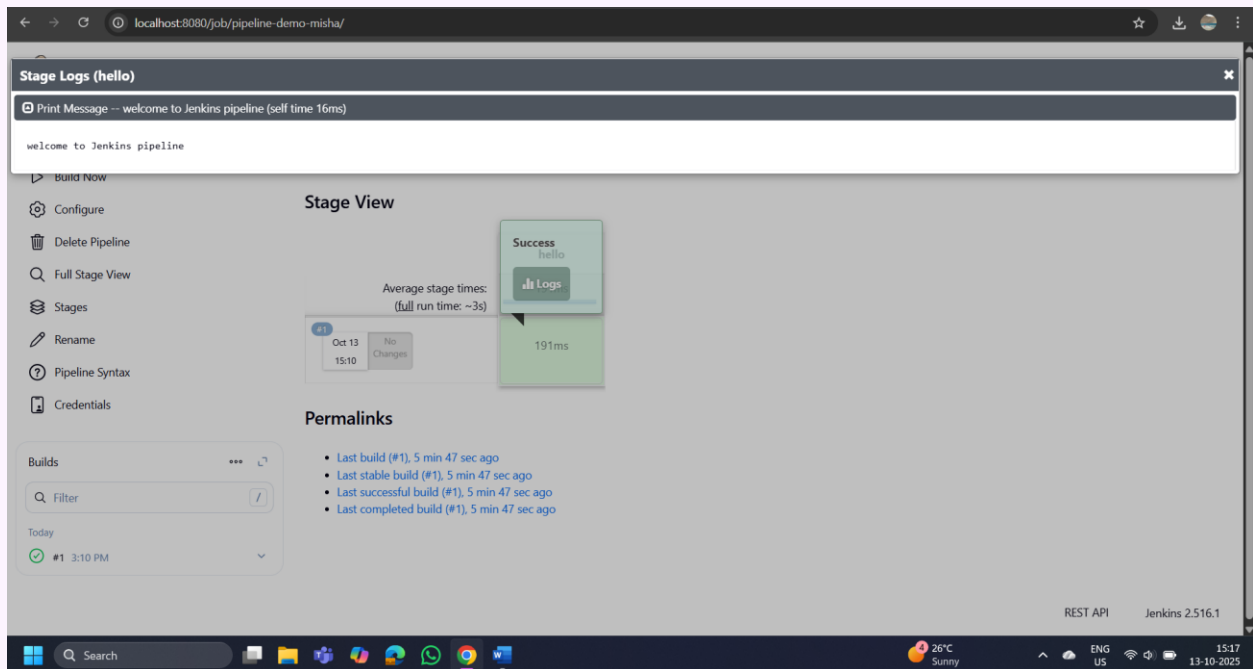

1.6 Click on **Build Now** to run the pipeline script as shown in the screenshot below:

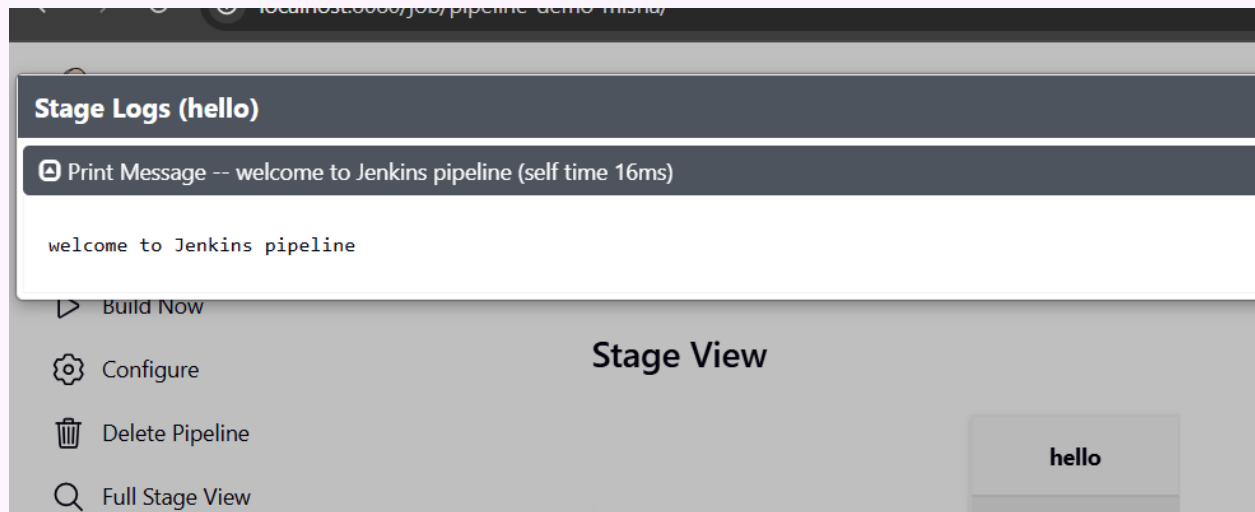

1.7 Hover over the milliseconds number next to the build stage name as shown in the screenshot below:

1.8 Click on **Logs** as shown in the screenshot below:

1.9 Check for the message in the top-left corner to confirm the successful execution of the pipeline stage as shown in the screenshot below:

By following these steps, you have successfully created a pipeline script for automating build processes in Jenkins.
